NORTHWEST DOOR®

Northwest Door, Inc - PO Box 44605 - Tacoma, WA 98448

Heavy Duty Commercial Grade Aluminum

Construction

Modern Classic is constructed of commercial grade extruded aluminum alloy stiles and rails. Mechanical fasteners that connect the stiles and rails are extremely strong and visually undetectable. The Modern Classic comes standard with a clear anodized finish. Optional finishes include black anodized, dark bronze anodized, white Polycron® III polyester finish and many non-stock colored Duranar® painted finishes. The white polyester finished doors can also be easily field painted to your exact color requirement.

The Modern Classic can be built with either aluminum or glass panels. Standard aluminum panels are smooth and .050 thick. You may also choose 1/4" laminated panels which have a polyvinyl honeycomb core or 1/2" thick Polystyrene or Urethane insulated panels. Glass thicknesses are available from 1/8" to 1/2" thick. Choose from many tinted and patterned glass, single pane or insulated, either tempered, laminated or annealed. Low-E type glass is available in insulated units only. Other specialty glass and or panel materials are also available allowing design flexibility if you wish to match other elements or materials on your home.

NOMINAL SPECIFICATIONS, DOOR:

- Frame:** 2" Thick Extruded Aluminum 6063-T6
- Section Joint:** Shiplap Joint on Meeting Rails, Between Door Sections
- Top & Bottom Rail Widths:** 5-7/8" (5-1/2" on Flat)
- Meeting Rails, Combined Width:** 4-3/16" (3-1/2" on Flat)
- End Stile Width:** 5-7/8" (5-1/2" on Flat)
- Center Stile Width:** 3-1/4" (2-1/2" on Flat)
- Panels:** 1/8" Clear Tempered Glass (Standard)
- Finish:** Class II Clear Anodized (Standard)
- Bottom Weather Seal:** U-Shape Loop Type Vinyl
- Warranty, Door:** Limited Lifetime

NOMINAL SPECIFICATIONS, HARDWARE:

15" or 12" radius torsion hardware; track is 2" bracket mounted. 3" Track is supplied when required by door weight. 10,000 Cycle oil tempered torsion springs, non-corrosive door fixtures, graduated hinges and long life white nylon rollers with ball bearings are standard. U-shaped galvanized struts are supplied with every double car door and as required by weight to keep door rigid. Standard one year warranty on operational hardware.

ENVIRONMENTAL ADVANTAGES:

The Modern Classic uses approximately 25% recycled aluminum in the aluminum frame; the maximum allowable to maintain both strength and quality assurance; all manufacturing scrapes are recycled. For thermal advantages, the door frame as well as the glass and aluminum panels can be insulated; Low-E glass is also available for additional thermal performance.

Standard Glass

is available annealed and tempered; in both single pane and insulated. When tinted or patterned glass is insulated; the tint or pattern will be the exterior pane of the insulated unit, the interior pane will be clear.

These glass samples were placed 7" in front of a photo to illustrate the transparency of the glass, the actual color may vary from these photos

★ Non-Standard or specialty glass is also available per your specifications up to a maximum 1/2" thickness
